

Urban Informatics
Assignment - Week 1

TYPE OF QUESTION: MCQ/MSQ

Number of questions: 16

Total marks: (12 X 1) + (4 X 2) = 20 marks

MCQ/MSQ Question

QUESTION 1: [1 mark]

Which of the following best captures the People dimension in the People–Place–Technology framework?

- a. GIS layers and spatial databases
- b. Urban infrastructure networks
- c. Urban stakeholders who both generate and use data
- d. Cloud computing platforms

Correct Answer: c. Urban stakeholders who both generate and use data

Detailed explanation: Refer to lecture 1.

QUESTION 2 : [1 mark]

Time-series data in urban informatics is mainly useful because it:

- a. Replaces spatial data
- b. Allows observation of trends and variations
- c. Reduces data volume
- d. Eliminates the need for sensors

Correct Answer: b. Allows observation of trends and variations

Detailed explanation: Refer to lecture 2.

QUESTION 3 : [1 mark]

Which of the following best represents the Velocity aspect of big data?

- a. Different data formats
- b. Large historical datasets
- c. Continuous inflow of data with minimal latency
- d. Accuracy of datasets

Correct Answer: c. Continuous inflow of data with minimal latency

Detailed explanation: Refer to lecture 2.

QUESTION 4 : [1 marks]

GTFS is primarily used for sharing:

- a. Satellite imagery
- b. Operational details of mass transit systems
- c. Census statistics
- d. Land-use zoning information

Correct Answer: b. Operational details of mass transit systems

Detailed explanation: Refer to lecture 2.

QUESTION 5 : [2 mark]

Match the following roles with their functions in the DataSmart Cities framework:

DataSmart Cities Role	Functions
P. City Data Officer (CDO)	i. National-level data strategy oversight
Q. Mission Data Officer (MDO)	ii. City-level data governance and policy
R. City Data Cell	iii. Analytics and operational data support
S. City Data Alliance	iv. Multi-stakeholder collaboration platform

- a. P–ii, Q–i, R–iii, S–iv
- b. P–i, Q–ii, R–iv, S–iii
- c. P–iii, Q–i, R–ii, S–iv
- d. P–ii, Q–iii, R–i, S–iv

Correct Answer: a. P–ii, Q–i, R–iii, S–iv

Detailed explanation: Refer to lecture 4.

QUESTION 6 : [1 mark]

Data-driven governance relies mainly on:

- a. Manual reporting systems
- b. Analysis of systematically collected data to support actions
- c. Political intuition
- d. Paper-based records

Correct Answer: b. Analysis of systematically collected data to support actions

Detailed Solution: Refer to lecture 2.

QUESTION 7 : [1 mark]

Citizen science differs from traditional data collection because it:

- a. Uses only expert surveys
- b. Depends entirely on sensors
- c. Actively involves citizens in data generation
- d. Avoids digital tools

Correct Answer: c. Actively involves citizens in data generation

Detailed Solution: Refer to lecture 3.

QUESTION 8 : [1 marks]

Which of the following is a key challenge related to the digital divide?

- a. Lack of urban land
- b. Unequal access to internet and digital skills
- c. Excessive data availability
- d. Overuse of GIS

Correct Answer: b. Unequal access to internet and digital skills

Detailed Solution: Refer to lecture 3.

QUESTION 9 : [2 mark]

Match the following open-data platforms with their key features:

Open Data Platform	Key Feature
P. Pune Open Data Portal	i. Real-time transport APIs
Q. NYC Open Data	ii. Machine-readable municipal datasets
R. Transport for London (TfL)	iii. Legal mandate for open data publication
S. NIUA – Centre for Digital Governance	iv. Digital governance standards and platforms

Choose the correct option:

- a. P–ii, Q–iii, R–i, S–iv
- b. P–i, Q–ii, R–iv, S–iii
- c. P–iii, Q–ii, R–i, S–iv
- d. P–ii, Q–i, R–iii, S–iv

Correct Answer: a. P–ii, Q–iii, R–i, S–iv

Detailed Solution: Refer to lecture 5.

QUESTION 10 : [1 mark]

Integrated Command and Control Centers (ICCCs) are mainly designed to:

- a. Store archival records
- b. Enable real-time monitoring of multiple urban systems
- c. Replace municipal departments
- d. Conduct public surveys

Correct Answer: b. Enable real-time monitoring of multiple urban systems

Detailed Solution: Refer to lecture 4.

QUESTION 11 : [1 mark]

Which feature distinguishes advanced open-data platforms like NYC Open Data?

- a. Manual data updates
- b. Limited datasets
- c. Automated data pipelines and legal backing
- d. No third-party API access

Correct Answer: c. Automated data pipelines and legal backing

Detailed Solution: Refer to lecture 5.

QUESTION 12 : [1 mark]

UPYOG is developed under the National Urban Digital Mission by MoHUA and _____.

- a. ISRO
- b. NITI Aayog
- c. NIUA
- d. MeitY

Correct Answer: c. NIUA

Detailed Solution: Refer to lecture 5.

QUESTION 13 : [1 mark]

The open data platform of Transport for London provides standardized transport data through a _____ interface.

- a. Closed database
- b. Unified API
- c. Manual reporting system
- d. Spreadsheet portal

Correct Answer: b. Unified API

Detailed Solution: Refer to lecture 5.

QUESTION 14 : [2 marks]

Match the following digital participation concepts with their descriptions:

Digital Participation	Description
P. Citizen Science	i. Online voting and project prioritization by residents
Q. Participatory Budgeting	ii. Citizens contributing data for scientific or governance purposes
R. Issue-reporting platforms	iii. Mobile or web tools for reporting civic problems
S. Online consultations	iv. Digital forums and virtual town-hall meetings

Choose the correct option:

- a. P–ii, Q–i, R–iii, S–iv
- b. P–i, Q–ii, R–iv, S–iii
- c. P–iii, Q–i, R–ii, S–iv
- d. P–ii, Q–iv, R–i, S–iii

Correct Answer: a. P–ii, Q–i, R–iii, S–iv

Detailed Solution: Refer to lecture 3.

QUESTION 15 : [1 mark]

Under the DataSmart Cities framework, which data type should not be openly published?

- a. Public datasets
- b. Aggregated statistics
- c. Personal data without anonymization
- d. Non-personal open data

Correct Answer: c. Personal data without anonymization

Detailed Solution: Refer to lecture 4.

QUESTION 16 : [2 mark]

Which of the following is a key objective of UPYOG?

- a. Centralizing all city data at the national level
- b. Enabling interoperable and scalable urban digital services
- c. Replacing municipal staff
- d. Limiting citizen interaction

Correct Answer: b. Enabling interoperable and scalable urban digital services

Detailed Solution: Refer to lecture 5.
